**COMMENTS IN OPPOSITION TO PETITION
ON BEHALF OF
THE NEW JERSEY DIVISION OF RATE COUNSEL**

The New Jersey Division of Rate Counsel (“Rate Counsel”)¹ submits the within comments in opposition to the above-captioned Petition filed on behalf of Comcast Cable Communications, LLC (“Comcast”) with the Federal Communication Commission (“FCC”) Media Bureau (“Bureau”) for a declaration of effective competition in the Mullica and Weymouth franchise areas in New Jersey.² Rate Counsel opposes the Petition because it is based on unreliable and incomplete data and hence, fails to rebut the presumption that effective competition does not exist in the franchise areas considered

^{1/} Rate Counsel is authorized to represent the public interest of New Jersey public utility and cable television service consumers before State and Federal regulatory bodies. See N.J.S.A. 52: 27 EE - 48, 55.

^{2/} See Public Notice Report No. 376, Special Relief and Show Cause Petitions dated June 22, 2012. Rate Counsel obtained the consent of Comcast extending the time to file comments until August 12, 2012.

here. As a result, the Petition should be denied allowing the Local Franchise Authority (“LFA”)³ to retain the authorization to regulate the cable carrier’s basic service tier rates to protect ratepayers from unfettered rate increases.

LEGAL ARGUMENT

COMCAST FAILS TO SATISFY THE COMPETING PROVIDER TEST

Comcast has failed to sustain its burden of proof to rebut the presumption against the existence of effective competition in the subject franchises claimed under the competing provider test. The household data and satellite penetration data it submits are neither contemporaneous to one another nor current as of the filing date. Additionally, the underlying data supporting the results of its zip code/satellite penetration analysis is not provided for examination, thus thwarting the ability to probe Comcast’s conclusions. Furthermore, the limited data relied upon is misleading and flawed. As a result of these deficiencies, Rate Counsel submits that Comcast has failed to sustain its burden of proof for the respective franchises to satisfy the statutory criteria for a declaration of effective competition. Therefore, the Petition should be denied.

Section 543 of the Communications Act of 1934, as amended by Section 623 of the Telecommunications Act of 1996,⁴ provides that subscriber rates of cable television systems are subject to either local or federal regulation where effective competition is absent.⁵ The Comcast franchises at issue here are currently subject to the regulatory jurisdiction of the Local Franchise Authority (“LFA”) for the State of New Jersey, the

^{3/} In New Jersey, the LFA is the New Jersey Board of Public Utilities, Office of Cable Television, see N.J.S.A. 48:5A-2, *et. seq.*

^{4/} Pub. L. No. 104, 100 Stat. 56, approved February 8, 1996, codified at 47 *U.S.C.* § 151 *et seq.*

^{5/} 47 *U.S.C.* § 543(a)(2).

New Jersey Board of Public Utilities ("Board"), based on the FCC's certification that effective competition is not present there. Under FCC rules, a cable operator who claims that effective competition exists in a particular franchise, and seeks to rebut the statutory presumption against the existence of effective competition, must satisfy one of four tests set forth in Section 76.905(b) of the Commission's rules.⁶ The statutory burden of proof rests exclusively with the cable operator to rebut the presumption by competent evidence.⁷

Comcast invokes the competing provider test for the claim that the two subject franchises are subject to effective competition as of the date of filing. Under this test, a cable operator must provide competent evidence demonstrating that a franchise is subject to effective competition because the franchise is: (1) served by at least two unaffiliated multichannel video programming distributors ("MVPDs"), each of which offers comparable programming to at least 50 percent of the households in the franchise area; and (2) the number of households subscribing to multichannel video programming other than the largest multichannel video programming distributor exceeds 15 percent of the households in the franchise area.⁸ A finding of effective competition exempts a cable operator from rate regulation.⁹ Here, Comcast has the burden of proof and must

⁶/ 47 C.F.R. § 76.905(b).

⁷/ Regardless of whether an effective competition is contested or not, the cable operator's failure to sustain the burden of proof must result in denial and dismissal of the Petition. *See Cox Southwest Holdings, LP, ten Unopposed Petitions for Determination of Effective Competitions in 17 Local Franchise Areas*, CSR 6877-E, etc., DZ 07-933 (Released March 2, 2007); *I/M/O Time Warner Entertainment Co. LP*, CSR 5136-E, DA 99-234 (Released January 26, 1999).

⁸/ 47 U.S.C. § 623(l)(1)(B); See also, 47 C.F.R. § 76.905(b)(2).

⁹/ 47 C.F.R. § 76.905.

affirmatively demonstrate that at the time of filing each claimed franchise was subject to effective competition by satisfaction of the competing provider test.¹⁰

Comcast asserts that it meets the competing provider test because direct broadcast satellite (“DBS”) service (from providers DirecTV and DISH Network) is readily available in the two franchises and that satellite subscribership in each franchise exceeds fifteen percent of the households in each franchise.¹¹ Comcast relies on the 2010 Census for the number of households for its calculation to show that satellite penetration in the two franchises exceeds the statutory 15% threshold. Although Comcast avers it is the largest MVPD servicing the Mullica franchise, as for the Weymouth franchise area it admits it is not the largest MVPD.¹² Hence, application of the competing provider test for the Weymouth franchise is inappropriate. Moreover, the Weymouth franchise was the subject of an earlier Petition seeking effective competition, CSR-7869-E, granted February 18, 2009.

Comcast relies on a satellite subscriber count as of February 29, 2012, although the Petition was filed on June 12, 2012. On its face, neither the household data nor the satellite subscriber data can accurately reflect the number of households and satellite subscribers in each franchise in June 2012 when the Petition was filed, as the household data and satellite data are not contemporaneous to one another as of the time of filing. The need for contemporaneous data is apparent because if the Petition is granted, the revocation of regulatory authority is effective retroactive to the date the Petition was

^{10/} See *In re C-Tec Cable Systems of Michigan, Inc.*, 10 F.C.C.R. 1735, 1736 (1995); See also, *Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992*, 8 FCC Rcd. 5631, 5669-70 (1993) (“*Report and Order*”).

^{11/} Petition at 2-8.

^{12/} Petition at 7.

filed. Evidence in support of the Petition, therefore, should consist of franchise household data and satellite penetration data that show the alleged competitive conditions as of the filing date. The data submitted by Comcast fails to provide the support necessary to conclude that in June 2012 satellite subscribership in the subject franchises exceeded 15% of the households in each franchise.

Comcast's reliance upon satellite penetration data and household data that are not reasonably contemporaneous in time to the filing date is insufficient to show that effective competition was present at the time of filing.¹³ See, *I/M/O Cable Operator's Petitions for Reconsideration and Revocation of Franchising Authorities' Certifications to Regulate Basic Cable Service Rates*, 9 FCC Rcd 3656 (1994) ¶ 3. In opposing an LFA's certification to regulate, cable operators must rely on competitive subscriber data as of the time of the certification, but no earlier than two months before the request for certification was filed. Similarly, the data submitted in support of a petition for a determination of effective competition should be supported by data similarly contemporaneous to the date the petition is filed. A "complete when filed" requirement is necessary in order to weigh supporting data of even date. Fundamental due process compels application of a requirement that reasonably contemporaneous data be supplied at the time of filing.¹⁴ If a "complete when filed" rule is not applied, the resulting decision is arbitrary and capricious, as the decision would rely on data of disparate timeframes. In this connection, Rate Counsel incorporates by reference arguments

^{13/} See, *I/M/O Cable Operator's Petitions for Reconsideration and Revocation of Franchising Authorities' Certifications to Regulate Basic Cable Service Rates*, 9 FCC Rcd 3656 (1994) ¶ 3.

^{14/} *Id.* See also, Opposition of Rate Counsel, dated December 2, 2004, *I/M/O Petition Service Electric of New Jersey for a Determination of Effective Competition in Morris County, Sussex County, and Warren County*, CSR-6404-E.

submitted in its Applications for Review currently pending before the Commission, in support of Rate Counsel's position on the need to apply a reasonably contemporaneous data standard.¹⁵

In addition, the satellite subscriber data submitted by Comcast does not account for any cancellations in the months that elapsed between the survey and the filing of the Petition. This time lag undermines the reliability of the satellite penetration data. Publicly available declarations by DirectTV and Dish to the Securities and Exchange Commission, Quarterly Reports for 2012, show adverse fluctuations in subscribership as of March 2012.¹⁶ The impact of such fluctuations on the subject franchises is not evident in this matter. The data submitted by Comcast fails to recognize the impact of this critical fact. More recent data for the 2d quarter confirms continued declines in Dish and DirectTV subscribership.¹⁷

Also, the Petition fails to demonstrate that either satellite carrier provides a basic service tier that includes public, educational and government ("PEG") channels as is required of Comcast. This disparity alone should suffice to distinguish the video service of the satellite providers from that provided by Comcast. Incomparable service does not equate with head-to-head competition. The comparability component of the Competing

^{15/} See *Application for Review in I/M/O Petition of Cablevision of Rockland/Ramapo, Inc. for a Determination of Effective Competition in Montvale, NJ*, CSR-6537-E; *Petition of CSC TKR, Inc. d/b/a Cablevision of Elizabeth for a Determination of Effective Competition in Elizabeth, NJ*, CSR-6670-E; *Petition of Cablevision of Warwick LLC for a Determination of Effective Competition in West Milford, NJ*, CSR-6671-E, filed July 25, 2007; and *Application for Review in I/M/O Cablevision of Raritan Valley, Inc.*, CSR 6108-E; *Cablevision of New Jersey*, CSR 6169-E; *Cablevision of Monmouth*, CSR 6176-E, filed May 14, 2004.

^{16/} See attached Exhibit A.

^{17/} *Id.*

Provider Test cannot be satisfied without the provision of PEG channels by the satellite carriers as part of a basic service tier channel alignment.

Additionally, information obtained from the LFA indicates that Comcast's plant does not extend to the entire geography of any franchise at issue here. Hence, effective competition cannot be granted since such a declaration would apply to areas within the franchises that admittedly are not served by Comcast.¹⁸

Furthermore, the Petition is also deficient due to Comcast's failure to submit the analysis, maps and work papers that underlie and support the calculation of satellite penetration submitted by Comcast. Comcast only submits the results generated by Satellite Broadcasting and Communications Association ("SBCA"). The failure to disclose the underlying data deprives Rate Counsel, the Media Bureau, and interested parties of the ability to examine, challenge, and verify that the reported numbers submitted by Comcast are complete and accurate. Any mapping considered by SBCA would demonstrate the extent of Comcast's plant in each franchise per zip code referenced. Since the FCC will rely upon the data submitted by Comcast to decide compliance with the competing provider test, it is incumbent upon Comcast to supply all underlying data and analyses used to derive the numerical results it relies upon. See, *American Radio Relay League, Incorporated v. Federal Communications Commission, et al.*, No. 06-1343, (D.C. Cir. April 25, 2008) wherein the Court of Appeals remanded an FCC decision that violated the APA due to the FCC's failure to make available for public comment certain records it relied upon in its decision. See also, *Owner-Operator Independent Drivers Association, Inc., v. Federal Motor Carrier Safety Administration, et. als.*, 494 F.3d 188, 199 (D.C. Cir. 2007). (The APA requires that critical factual

^{18/} See attached Exhibit B.

material used to support the agency decision must have been made public in the proceeding and exposed for refutation. The Petitioner must submit the factual underpinnings for the percentages claimed.) See also, *Solite Corp. v. US EPA*, 952 F. 2d 473, 485 (D.C. Cir. 1991) (Courts have ruled that under the APA an agency may not rely on any information on which interested parties are not given access or the opportunity to comment.) The underlying data from which the exhibits in the Petition were prepared have not been submitted for examination, verification or challenge. Instead, Comcast has submitted only the results without the underlying data. A determination that effective competition exists without opportunity for public scrutiny of the underlying data would be an arbitrary and capricious finding.

CONCLUSION

For the foregoing reasons, the instant Petition fails to sustain the burden of proof to satisfy the competing provider test and hence, the Petition should be denied.

Respectfully submitted,

Stefanie A. Brand
Director,
New Jersey Division of Rate Counsel

EXHIBIT A

CORPORATE NEWS

Evidence Grows on TV Cord Cutting

By Sharon Bernstein

The most intense debate in television today—whether the lure of Netflix and YouTube is causing viewers to disconnect their cable-TV service—is likely to intensify after new figures showed a slight decline in overall pay-TV subscribers in the second quarter.

Publicly traded cable, satellite and phone companies had a combined net loss of about 200,000 subscribers in the quarter, earnings reports showed, about 0.2% of the roughly 100 million pay-TV subscribers. Sanford C. Bernstein estimates the overall industry shed more than 400,000 subscribers during the period when results for closely held operators are included.

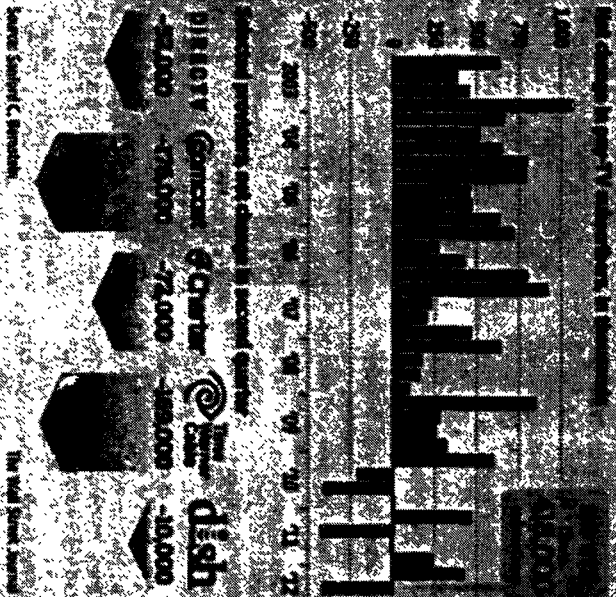

A sustained decline in the number of people subscribing to pay-TV has ramifications for pay-TV operators and for TV channels, most of which share in the fees paid by subscribers. Big entertainment companies generate much of their profits from subscription fees paid to TV channels.

TV executives so far are divided on cord-cutting. Some, such as Dish Network Corp. Chairman Charlie Ergen, acknowledge that people are switching to cheaper alternatives. He even cites his own children's behavior as proof. Others, particularly on the entertainment side, dismiss the idea. The debate has influenced negotiations between pay-TV operators and channel owners over fees, such as the recent blowup between DirectTV and Viacom Inc., as operators warn that demands for higher fees could fuel cord-cutting.

The second-quarter numbers won't conclusively settle the argument. The April-through-June

Watch Out

Power players are getting into traditional pay-TV space through cable, phone company and satellite providers.

Source: Sanford C. Bernstein

In real time, losses

quarter is traditionally a weak period for pay-TV operators, as college students disconnect their service, typically returning in the fall, companies say. Last year, and in 2010, the pay-TV industry made up for declines in the second and third quarters with gains in the first and fourth quarters. Both years posted net growth of about 200,000 subscribers.

Even so, Craig Moffett, an analyst at Sanford C. Bernstein, points out that the year-on-year growth rate is below the level at which new households are being formed, suggesting "there are homes that are cutting the cord."

In the past few years, the number of free or inexpensive online video options have grown rapidly. Amazon.com Inc.'s Prime service and Netflix Inc. offer old episodes of some popular TV shows. Google Inc.'s YouTube has made a big push to invest in creating channels of original content. And several TV channel owners put full episodes of certain shows on websites.

Prior to 2010, the pay-TV industry never saw a quarterly subscriber decline. Since then, declines have surfaced in five different quarters, according to Bernstein research, startling an industry that for decades had added customers at a brisk clip.

The proportion of households subscribing to pay television increased to about 88% currently from 63% in 1992, according to the National Cable & Television Communications Association.

Satellite-TV and phone companies have been recruiting pay-cable operators' turf for several years, but they are being affected by the overall market slowdown in the latest quarter. DirectTV lost subscribers in the U.S. for the first time in its history.

Verizon Communications Inc.'s FiOS and AT&T Inc.'s U-Verse, both of which are newer in providing pay-TV services than cable or satellite, continued to add subscribers—but the rate of growth fell 30% from a year earlier.

Comcast Corp., Time Warner Cable Inc., Cablevision Systems Corp. and Charter Communications Inc. have lost a combined total of more than 400,000 subscribers in each second quarter since 2010, more than double the less-than-300,000 losses between 2008 and 2010, Bernstein's data shows.

In addition, video revenues declined for several cable operators in the latest quarter.

Cable operators are still enjoying growth in their Internet-access broadband business. Time Warner Cable said last week that the number of Internet-only subscribers increased 25% from a year earlier.

Charter Chief Executive Tom Rutledge said on Tuesday that the company has about a million customers out of about five million total—who subscribe to broadband only. He said he sees the potential to sell that group more products as a "big opportunity." In contrast, "there's a lot of inertia in the video business," he said.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

You should read the following discussion and analysis of our financial condition and results of operations together with the condensed consolidated financial statements and notes to the financial statements included elsewhere in this quarterly report. This management's discussion and analysis is intended to help provide an understanding of our financial condition, changes in financial condition and results of our operations and contains forward-looking statements that involve risks and uncertainties. The forward-looking statements are not historical facts, but rather are based on current expectations, estimates, assumptions and projections about our industry, business and future financial results. Our actual results could differ materially from the results contemplated by these forward-looking statements due to a number of factors, including those discussed in our Annual Report on Form 10-K for the year ended December 31, 2011, our Quarterly Report on Form 10-Q for the three months ended March 31, 2012 and this Quarterly Report on Form 10-Q under the caption "Item 1A. Risk Factors."

EXECUTIVE SUMMARY**Overview**

✂ DISH lost approximately 10,000 net subscribers during the three months ended June 30, 2012, compared to a loss of approximately 135,000 net subscribers during the same period in 2011. This decrease in the number of net subscribers lost versus the same period in 2011 resulted from higher gross new subscriber activations and a lower churn rate. Higher gross new subscriber activations were primarily due to increased advertising associated with our Hopper set-top box during the second quarter 2012. During the three months ended June 30, 2012, DISH added approximately 665,000 gross new subscribers compared to approximately 572,000 gross new subscribers during the same period in 2011, an increase of 16.3%.

Our average monthly subscriber churn rate for the three months ended June 30, 2012 was 1.60% compared to 1.67% for the same period in 2011. While churn improved compared to the same period in 2011, increased competitive pressures could increase churn in the future. Our churn rate is also impacted by, among other things, the credit quality of previously acquired subscribers, our ability to consistently provide outstanding customer service, and our ability to control piracy.

Our gross new subscriber activations continue to be negatively impacted by increased competitive pressures, including aggressive marketing and discounted promotional offers. In addition, telecommunications companies continue to grow their customer bases. Our gross new subscriber activations continue to be adversely affected by sustained economic weakness and uncertainty, including, among other things, the weak housing market and lower discretionary spending.

DISH added approximately 94,000 net subscribers during the six months ended June 30, 2012, compared to a loss of approximately 77,000 net subscribers during the same period in 2011. The increase versus the same period in 2011 primarily resulted from a decrease in our average monthly subscriber churn rate and higher gross new subscriber activations due to increased advertising associated with our Hopper set-top box. Our average monthly subscriber churn rate for the six months ended June 30, 2012 was 1.48% compared to 1.57% for the same period in 2011. Our churn rate was positively impacted in part because we did not have a programming package price increase in the first quarter 2012, but did during the same period in 2011. During the six months ended June 30, 2012, DISH added approximately 1.338 million gross new subscribers compared to approximately 1.253 million gross new subscribers during the same period in 2011, an increase of 6.8%.

"Net income (loss) attributable to DISH Network" for the three and six months ended June 30, 2012 was \$226 million and \$586 million, respectively, compared to \$335 million and \$884 million, respectively, for the same periods in 2011. During the three months ended June 30, 2012, "Net income (loss) attributable to DISH Network" decreased primarily due to higher subscriber-related expenses from higher programming costs, increased advertising associated with our Hopper set-top box and \$68 million of depreciation expense related to the 148 degree orbital location during the second quarter 2012. See Note 7 in the Notes to the Condensed Consolidated Financial Statements for further discussion. During the six months ended June 30, 2012, "Net income (loss) attributable to DISH Network" decreased primarily due to higher subscriber-related expenses from higher programming costs, increased advertising associated with our Hopper set-top box, a reversal of our accrued expenses related to the TiVo Inc. settlement during 2011 and \$68 million of depreciation expense related to the 148 degree orbital location during

**Certification in Support of Opposition on Behalf of
The New Jersey Division of Rate Counsel**

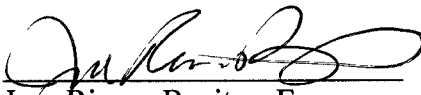

I, JOSE RIVERA-BENITEZ, of full age, certify as follows:

1. I am a duly licensed attorney in good standing in the State of New Jersey. I am employed as an Assistant Deputy Rate Counsel in the New Jersey Division of Rate Counsel. This certification is submitted in support of arguments made by Rate Counsel in opposition to this Petition.
2. In preparation for comments in opposition to this Petition, I sought information from the New Jersey Board of Public Utilities' Office of Cable Television ("OCTV"), the Local Franchise Authority, concerning the franchises that are the subject of this matter. Additionally, I sought information directly from the respective communities involved in this Petition that would either confirm or dispute the assertions made by Comcast Cable Communications LLC ("Comcast").

3. Information obtained from OCTV relates that none of the towns involved in this matter are a full build out and have a 35 home per mile stipulation for service extensions beyond the primary service area. (See attached e-mail response from OCTV dated July 25, 2012.) Maps depicting the service territory are not publicly available.

I certify that the foregoing statements made by me are true. I am aware that if any of the foregoing statements made by me are willfully false, I am subject to punishment.

Subject: RE: Comcast subscriber numbers and mapping data

Jose:

Took me awhile to confirm some things, but this is what I have:

None of the nine towns are a full build and have a 35 homes per mile stipulation in the franchise for service extensions beyond the primary service area.

Comcast, like Verizon, files its maps and customer numbers on a confidential basis – therefore we can't provide them directly. They are only available through the company or you could file an OPRA request for them.

Finally, our records indicate that Lebanon Twp. was approved by the FCC effective 2/18/09 in Dkt #CSR-7868E

Hope this helps

To: Furlong, William
Subject: Comcast subscriber numbers and mapping data

Bill:

we are looking at recent petitions for effective competition filed by Comcast and a couple of questions arise:

First, in the following franchises, does Comcast plant extend to the entire franchise? and if not are there maps that provide the perimeter?

Second, for the same franchises, what is the most current known Comcast subscriber numbers?

The franchises are:

Hampton Borough
Independence
Lebanon
Mansfield Township
Washington Borough
Washington Township (Morris County)
Washington Township (Warren County)

Mullica
Weymouth

Any information you can provide would be helpful in assessing our potential arguments.
